Gasoline Economy Contest
Another Maxwell Triumph

The greatest demonstration ever staged by any automobile company---thousands of Maxwells, here and all over the United States and Canada, took part in the history-making runs---U. S. Liberty Bond Prizes to be awarded at once.

Once more—on an international scale—the Maxwell's economy has been put beyond quibble or question.

Thousands of Maxwell cars, equipped with the famous red contest gasoline tanks, have made one gallon runs.

The figures are not yet compiled—are not all in

—but we know from the returns already received that splendid mileage averages have been made

—that the Maxwell's position as world economy champion has been made more than ever secure.

Splendid One Gallon Runs Made By Maxwell Owners Here

Among the best scores made in the local red tank runs were the following:

H. V. Jenks, on June 22, made 40.3 miles on one gallon of gasoline.

D. B. Donaldson, on June 27, made 39.9 miles.

Miss Yudelson, on June 28, made 39.9 miles.

The contest was limited to owners of Maxwells, driving their own cars.

Each had to carry with him on the run three official observers, named by us, who certified to the result.

\$50,000 in U. S. Liberty Bonds to be Awarded Now

The Maxwell Motor Sales Corporation set aside the \$50,000 in bonds.

Half of the bonds are to go to the 500 Maxwell owners who made the best one-gallon mileages.

The other half of the bonds will be apportioned among Maxwell dealers for assisting in this immense undertaking.

Why Don't You Own a World Champion Maxwell?

Maxwell economy is proved ten times over.

A Maxwell will go further on a gallon of gasoline than any other 5-passenger car built.

It is mechanically right.

The highly efficient, handsome Maxwell touring car sells for \$665, f.o.b. Detroit.

Come to our sales rooms and buy your Maxwell now.
